

Apron and Taxiway Overlay

»» Project Overview

**Ballina Byron Gateway Airport
infrastructure upgrades**

»» What will be happening?

Ballina Byron Gateway Airport is set to commence a major maintenance project known as the **Apron and Taxiway Overlay Project 2016**.

The Apron and Taxiway Overlay Project involves the installation of an asphalt overlay to the existing RPT Apron and Taxiway and improvement to the existing Taxiway pavement where required. In addition, the Taxiway lighting system will concurrently undergo a significant upgrade.

This will be one of the most significant capital projects since the airfield was originally constructed.

»» When will this work be commencing?

The planning and preparation of the Apron and Taxiway Overlay Project has been underway for some months, however the main Apron and Taxiway works will physically commence in April 2016 with high levels of maintenance activity visible on the RPT Apron during the night. The major works are being done at this time of the year to minimise the impact on the airport's customers.

The expected completion date for the Apron and Taxiway Overlay Project is mid May 2016, subject to weather conditions.

»» What impact will this have on passengers and aircraft operators?

During the period of the main works scheduled from April to May 2016, Ballina Byron Gateway Airport's main Apron will be closed to normal operations from 18:00 each evening to 05:30 the following morning. However, there will be increased maintenance activity at the Ballina Byron Gateway Airport during the day time period as well.

All passenger airlines and other aircraft operators have been made aware of the works. The Apron and Taxiway maintenance work will not affect normal scheduled passenger services.
